

# MANIFEST RAPID INSIGHTS PROGRAM LITE

Let our team help you successfully perform a comparative test to measure, assess, and prove the positive impact of Manifest work instructions on your organization

## OVERVIEW

Manifest step-by-step, digital work instructions help capture expert knowledge and guide front-line workers helping them perform their work more accurately and consistently.

The Lite program is a streamlined pilot program designed to help your team quickly get started with Manifest and assess its impact on your equipment, procedures, people and operations.

## PROGRAM USE CASES

- **Equipment operator training** – document and digitize operational procedures that help workers learn more effectively and act as on-the-job aids used as guides while workers safely operate equipment.
- **Inspections** – create digital procedures that train and guide workers on inspection procedures and automatically generate complete and comprehensive inspection reports.
- **Preventative maintenance** – produce precise workflows that enable workers to proficiently decrease your backlog of preventative maintenance to drive increases in operation efficiency

## GOALS

The Taqtile team will guide you through the entire pilot program, collecting tangible metrics that demonstrate Manifest's impact on your business challenges, while helping you:

- Validate its fit for your business needs
- Assess usability and user adoption
- Measure performance to secure program funding

## PROGRAM DELIVERABLES

- **Tailored pilot plan with clear success metrics:** Benefit from an expert-designed program plan that directly addresses your business challenges, complete with defined metrics to measure and ensure your pilot's success.
- **Expert guidance:** Experience seamless execution with help from Taqtile experts and a program designed by experience to optimize your pilot's performance and guarantee that critical goals are met.
- **Impactful reporting results:** Receive a written summary of results making it easy to share the success and insights gained from the pilot across your organization.

## PROGRAM DETAILS

### PLAN

Collaborate closely with the Taqtile team to pinpoint critical business or operational challenges, define the expected impact of Manifest on key use cases, and establish clear success metrics to ensure a data-driven, successful pilot project.

### CONFIGURE, CAPTURE, DOCUMENT

Leverage Taqtile's subject matter experts to seamlessly configure and optimize Manifest for your specific equipment and environment. Capture expert knowledge with video, and work with our team to build a step-by-step work instruction that documents one of your key procedures.

### DESIGN A COMPARATIVE TEST

Design and execute a robust A/B test or customized evaluation strategy to rigorously benchmark Manifest's performance, providing clear, actionable insights on its effectiveness compared to your current processes.

## EXECUTE AND EVALUATE

- Enable workers with new digital work instructions
- Gather worker feedback on procedures and iterate
- Benchmark against baseline metrics
- Solicit user feedback with interviews and surveys
- Assess and evaluate
- Share results
- Plan for operational use

## THE TAQTILE DIFFERENCE

With collective decades of experience with digital work instructions, spatial computing, enterprise deployments and custom professional software development, the Taqtile team is uniquely positioned to make you and your team successful.

We'll be with you on every step of your Manifest pilot assessment. From planning and defining success criteria to documentation and assessment through evaluation and communicating results, we'll help you be successful.

### ADDITIONAL PROFESSIONAL SERVICES AVAILABLE

- On-site consulting, training and support
- Creation of additional work instructions
- Custom workflow and data integrations
- Video documentation and highlight reels
